MAJ. DYE'S REPORT.

The Work of the Police Force for a Year. A Report and Recommendations Made for the Future.

Chief of Police Dye, in his annual report, says that there have been many improvements made in the condition of the force during the past year.

The full complement of the force on June 30, 1883, was 232. At present it is 212, consisting of 1 major, 1 captain and inspector, 10 lieutenants, 30 sergeants, and 180 privates of class 1 and 2.

There are also 132 persons holding commissions as private watchmen. There were two deaths during the year.

I can report, says the chief, "substantially no increase of crime, and no increase of the force."

The police department has been very successful in its work during the year.

We must have, says the chief, "a sufficient number of men, not only to keep the streets clean, but to prevent violations of the law."

The police department has been very successful in its work during the year.

We must have, says the chief, "a sufficient number of men, not only to keep the streets clean, but to prevent violations of the law."

PROBABLY MURDERED.

William Fagan, the Missing Grocer, Given up by His Friends.

The friends of William Fagan, the grocer of Sixteenth and U streets, who disappeared six weeks since, are fearful that he has been murdered.

A short time before his disappearance he placed a notice in the paper, stating that he had been arrested by a man named Miller, and that he was being held in a saloon at 715 1/2 street.

Miller, superintendent of the soldiers' cemetery at Arlington, Va., on the morning of the 23rd of July he stated that he was going to see Mr. Miller, and about 7:15 o'clock left the house, taking with him \$100, and a small bag.

After seeing Mr. Miller, to go to Newport News and make an investment. The friends of his friends have been looking for him ever since, but have been unable to find him.

There is nothing to indicate that he has been with the money for a few days before he had paid a debt of \$200, as some of his friends say.

He is described as a man of about 30 years, who carries his eyes, and has a fair complexion, and weighing over 200 pounds, fair complexion, with light brown hair, tinged with grey, and wearing a mustache and goatee. He leaves a wife and six children.

To make a search that is certain to please all tastes, you need only use Parker's Salad Dressing. Nothing could be more effective and more so popular. It is a superb table sauce.

Respectfully Referred.

To The Editor.

Would it not be well for the probable court of inquiry into the Greely Arctic expedition to endeavor to ascertain the effect of the absence of social life upon the human family, as developed by this expedition?

The bringing to light the horrors of their situation and the perils they encountered by them, if there be such, could be of no benefit to science unless the cause be first removed.
